

Sanad Solutions

Provider Portal – Product Modification Requirements

Version 1.0

Objective .1

.The Provider Portal represents the operational workspace for Sanad service partners

Unlike the original Handyman marketplace, providers are not publishing services or competing on price. Instead, providers operate as approved service offices that execute orders assigned by the Sanad platform while managing their internal employees and workflows.

The Provider Portal should therefore evolve into a lightweight Operations Management System rather than a marketplace dashboard

Overall Product Principles .2

:The Provider Portal should follow these principles

- .Providers execute orders under the Sanad brand
 - .Customers never choose providers
 - .Service pricing is fully controlled by Sanad
 - .Providers cannot create public services
 - .Providers manage employees, workflows and execution
 - .Providers are evaluated continuously based on operational KPIs
 - .Internal execution should be transparent for both the provider and Sanad Operations
-

Dashboard .3

.Replace the existing marketplace dashboard with an operations dashboard

Dashboard KPIs

- Total Orders •
 - New Orders •
 - Orders In Progress •
 - Completed Orders •
 - Delayed Orders •
 - Waiting for Customer •
 - Waiting for Government •
 - Average SLA •
 - Customer Satisfaction •
 - Active Employees •
 - Current Workload •
 - Monthly Revenue •
 - Pending Settlement •
 - Platform Commission •
-

Dashboard Widgets

- Today's Tasks •
 - Team Performance •
 - Recent Orders •
 - SLA Alerts •
 - Employee Workload •
 - Revenue Summary •
 - Notification Center •
-

Services Module .4

The existing Category / Service structure should remain in the system but be disabled for
.Phase 1

.This preserves future flexibility without removing the original architecture

Category

.Hide from provider

.No creation

.No editing

.No deletion

Sub Category

.Disabled

.Hidden

.Reserved for future use

Services

.Providers cannot create services

.Instead, they can enable or disable services offered by Sanad

:Example

Commercial Registration ✓

Municipality License ✓

Chamber of Commerce ✓

Labor Office ✓

Visa Services ✓

Accounting Services ✓

Legal Consultation ✓

:Each enabled service contains

- Service availability •
- Estimated execution time •
- Required employee skills •
- Internal notes •

.Pricing is managed only by Sanad

Bundles .5

.Existing Package module should remain available internally but disabled

.Providers cannot create public bundles

:Future use

- Business Packages •
- Investor Packages •
- Company Formation Packages •
- Accounting Packages •

Order Management .6

.This becomes the primary module

.Providers receive assigned orders from Sanad

:Each order includes

- Customer Information •
- Requested Service •
- Required Documents •
- Internal Notes •
- SLA Timer •
- Current Stage •
- Priority •
- Assigned Employees •
- Chat History •
- Uploaded Documents •

Provider Capabilities

:Provider can

Accept Order

(Reject Order (with reason

Request Missing Documents

Reassign Employees

Add Internal Notes

Upload Documents

Complete Current Stage

Request Admin Review

Mark Order Completed

Internal Employee Workflow .7

.One order may require multiple employees

:Example

Stage 1

Ahmed

↓

Stage 2

Sara

↓

Stage 3

Mohamed

:Provider defines

Employee

Role

Execution Order

Estimated Duration

Dependencies

:When one stage is completed

.The next stage is assigned automatically

.Parallel assignment should also be supported

:Example

Ahmed

↓

Legal Review

Sara

↓

Accounting Review

.Both run simultaneously before the next stage begins

Employee Management .8

:Rename

Handyman

↓

Employees

Employee Directory

:Contains

Employee Name

Job Title

Department

Skills

Current Status

Assigned Orders

Completed Orders

Average SLA

Performance Score

- Workflow Builder •
- Custom Approval Chains •
- Custom Employee Roles •
- Provider Analytics Dashboard •
- AI Operational Assistant •
- Provider Mobile App •
- Advanced Reporting •
- Cross-Office Resource Sharing •

Final Provider Portal Vision

.The Provider Portal is no longer a traditional marketplace vendor dashboard

It becomes a **Partner Operations Platform**, enabling Sanad partners to efficiently manage employees, execute government and business services, monitor operational performance, and maintain high SLA compliance under the unified Sanad brand
